

Billing One

Billing One - Manage your Billing accurately & Seamlessly

Billing One is a comprehensive & flexible billing engine, fully integrated with SAP Business One.

Billing One was developed based on Menahel4You's, a SAP Business One Business Partner, specialization in Billing oriented projects and is already implemented successfully in dozens of small & medium sized companies.

Billing One is a generic billing engine that can be easily customized according to the customer's specific scenarios.

Manage your billing in 4 simple steps:

Record billing contracts ➡ Run billing reports ➡ Generate invoices ➡ Run revenue recognition reports.

Billing One Advantages

- Record your engagement with your Customer in the billing contract screen (amounts, pricing plans, dates, contract attachments, accounting and payment info, etc.).
- Billing One's main component is The Billing & Rating engine that can generate invoices according to defined rules (based on specific contracts with end customers).
- Billing One is designed to support an enormous amount of possible billing scenarios and a vast number of pricing rules.
- Easy to define billing scenarios such as:
 - a. One-time fixed charges.
 - b. Repetitive fixed charges.
 - c. Consumption based charges (including Telecomm & Meter Reads).
 - d. Flexible pricing options (derived from customer/ price list / scaled price list etc.).
 - e. Charge freeze for a given period.
- Flexible Billing Cycles (monthly, quarterly, annual and user defined).
- Comprehensive control and approval process for accurate invoice generation.
- Revenue recognition functionality allows analyzing the revenues according to service dates ranges.

Billing One Target Market

Every small or midsize company that has a billing based contract with its customers and a need for repetitive invoicing such as:

- Newspapers & Magazines.
- Hosting / Disaster recovery service providers
- Small utility providers as Gas or Electricity.
- Mini warehouses (space rental).
- Telecommunications.
- Security services.
- Internet service providers / E-commerce.
- Information services providers.
- Office Equipment Rental.
- Real Estate (Shopping malls, commercial buildings).

Billing One is designed to assist such companies in managing their financial contracts with their customers and in generating the invoices accurately and rapidly according to a specific contract with the customer.

Integration with SAP Business One

- Billing One's user interface becomes part of SAP Business One, therefore allowing the user to work with a single software application for his/her operations.
- Powerful and hard-to-find combination between a leading software solution for small & midsize companies and robust easy-to-use billing software
- Billing One utilizes SAP Business One's built-in functionalities to the maximum by using data stored in SAP Business One as a base for its own rules and definitions.

Billing One

Return On Investment (ROI)

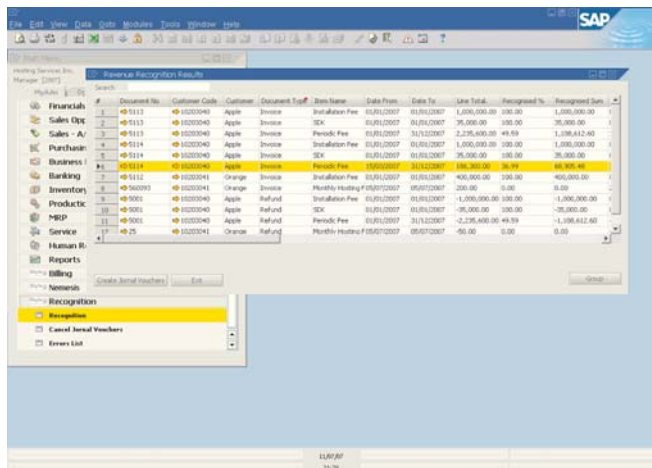

Being an automated billing engine, Billing One is a classic rapid ROI tool:

- By using Billing One, it is easier to create new rule based billings contracts and it is faster to generate billing based Invoices.
- Billing One minimizes the labor required to handle the 'Contract to Invoice' process.
- Billing One minimizes the possible billing errors and by that, increases the customers' satisfaction.
